

Today: a 7+ day manual loop, and what it costs us

Every missing or unclear document sends the file back through sales and branch, costing time, revenue and trust

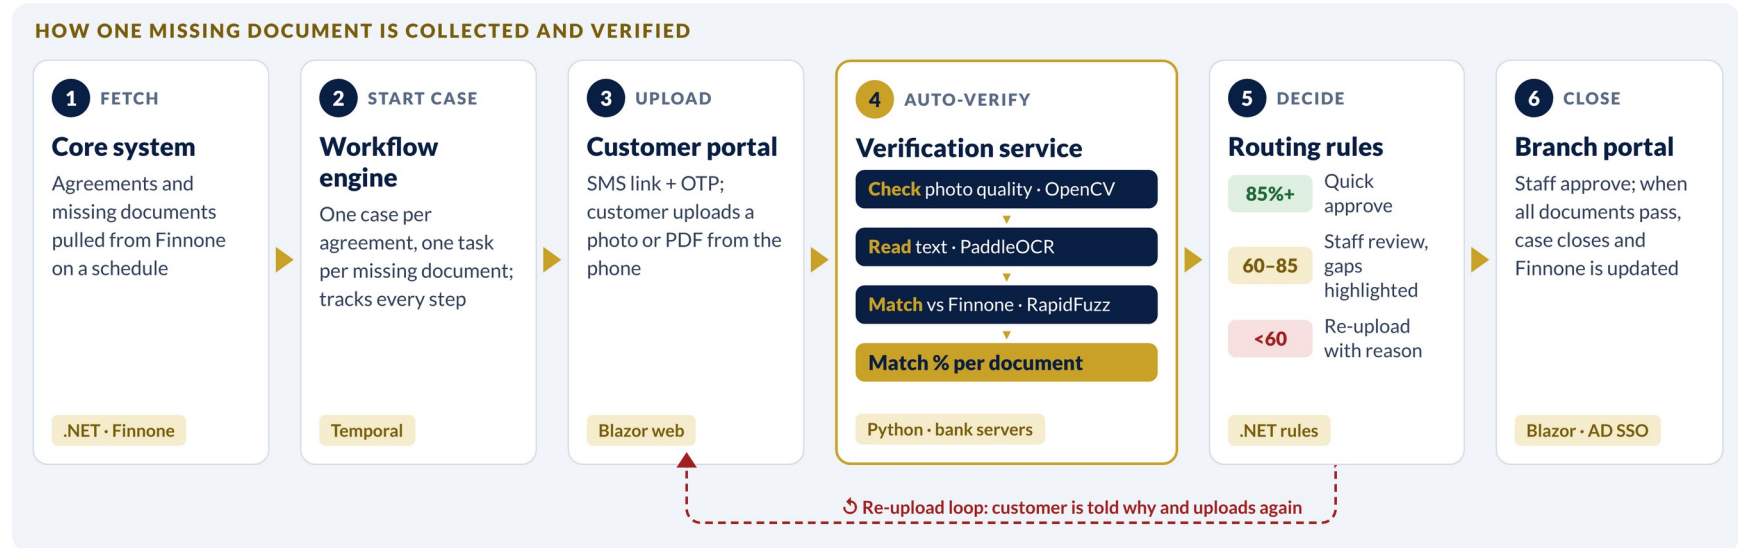

WHAT THE CURRENT SYSTEM IS COSTING US

- **Slow disbursal:** sanctioned loans wait a week or more; interest income and momentum are lost
- **Sales used as couriers:** RMs travel to collect papers instead of sourcing new business
- **Rework every cycle:** the same file is checked 2-3 times and errors are found late
- **Customer drop-off:** repeated calls and visits push agri customers to competitors
- **No tracking:** no single view of what is pending, with whom, or for how long
- **Physical document risk:** paper changes hands several times, with risk of loss and audit gaps

Technical architecture: how it works

HOW ONE MISSING DOCUMENT IS COLLECTED AND VERIFIED

OCR ENGINE · TWO OPTIONS

B · In-bank: PaddleOCR + Python rules
₹0 per page · documents never leave the bank

RECOMMENDED

A · Azure cloud: Azure Document Intelligence
~₹1 per document · processed in Azure India region

DATA

SQL Server: cases, OCR results, match scores, decisions, audit log

Encrypted document store inside the bank

PostgreSQL: Temporal's own workflow store

SECURITY

All processing on **bank servers**; only the SMS link and OTP go out via the bank gateway

OTP links · encryption · PAN / Aadhaar masked · staff SSO · every action audit-logged

Benefits of the new process

Same-day files for customers, time back for staff, lower cost and better control for the bank

108K

staff hours saved per year

₹5.57 Cr

net saving per year, after
SMS & infra

~54 FTE

capacity freed for business

7 → 1

days turnaround

WHAT THE NEW PROCESS DELIVERS

- **Same-day completion:** customer uploads once from the phone; clean files close in hours, not a week
- **Faster disbursal:** loans go out about 6 days earlier, worth roughly ₹0.89 Cr a year in interest
- **Sales time back:** no visits to collect papers; RMs focus on sourcing new loans
- **Less rework:** documents are checked at upload; branch reviews only flagged cases
- **Full visibility:** live status of every agreement and document, with SLA tracking
- **Lower cost:** ₹5,200 down to ₹560 per case; run cost about ₹13 L a year
- **Secure and compliant:** data stays on bank servers, encrypted, masked and fully audit-logged
- **Reusable platform:** the same verification service can serve other loan products

Thank you
