

Today: a manual loop that takes 7+ days

Every missing or unclear document sends the file back through sales and branch

7+ days

minimum turnaround

4 handoffs

customer, sales, transit, branch

2-3 visits

to the customer per case

No visibility

of status until papers arrive

What the delay is costing us

The cost is not only time: it is revenue, sales capacity and customer trust

Slow disbursal

Sanctioned loans wait a week or more; interest income and customer momentum are lost.

Sales used as couriers

Relationship managers travel to collect papers instead of sourcing new business.

Rework every cycle

Branch Ops checks the same file 2-3 times; errors are found late, not at the source.

Customer drop-off

Repeated calls and visits frustrate agri customers; some move to competitors.

No tracking

No single view of which document is pending, with whom, or for how long.

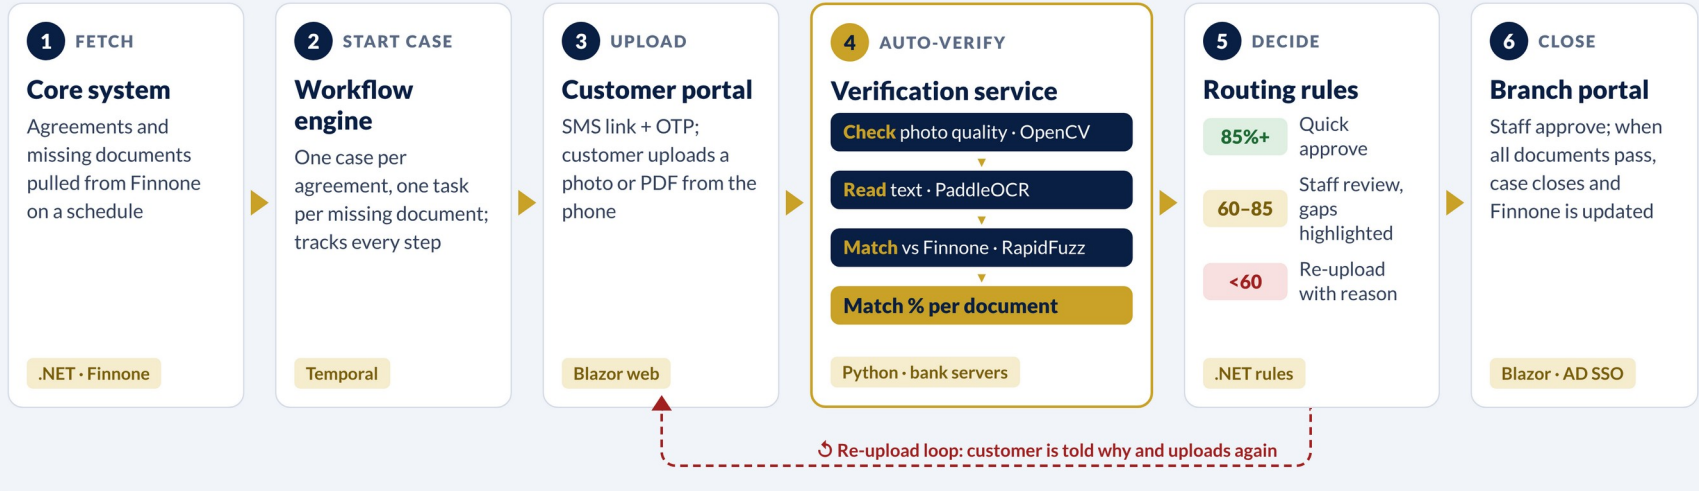

Physical document risk

Paper changes hands several times; risk of loss, misplacement and audit gaps.

Technical architecture: how it works

HOW ONE MISSING DOCUMENT IS COLLECTED AND VERIFIED

OCR ENGINE · TWO OPTIONS

B · In-bank: PaddleOCR + Python rules
₹0 per page · documents never leave the bank

RECOMMENDED

A · Azure cloud: Azure Document Intelligence
~₹1 per document · processed in Azure India region

DATA

SQL Server: cases, OCR results, match scores, decisions, audit log

Encrypted document store inside the bank

PostgreSQL: Temporal's own workflow store

SECURITY

All processing on **bank servers**; only the SMS link and OTP go out via the bank gateway

OTP links · encryption · PAN / Aadhaar masked · staff SSO · every action audit-logged

Annual impact

Illustrative, at 1,000 missing-document cases per month

108K

staff hours saved per year

₹5.57 Cr

net saving per year, after
SMS & infra

~54 FTE

capacity freed for
business

7 → 1

days turnaround

RUN COST PER YEAR • at 10,000 documents / month

₹0

OCR / AI • in-house, ₹0 / doc

₹1.2 L

SMS / WhatsApp • ₹1 / doc

₹12.0 L

Bank infra • fixed ₹1 L / month

₹13.2 L

total = ₹11 / document, ₹110 / case

Plus revenue upside: disbursing 6 days earlier adds about ₹740 interest per case, roughly ₹0.89 Cr a year, before counting fewer customer drop-offs.

Per case: ₹5,200 today vs ₹560 automated (₹450 staff + ₹110 run cost) = ₹4,640 saved. Infra is fixed, so ₹/doc falls with volume: ~₹6 at 20K, ~₹3.5 at 40K docs/month.
